

## CLAIMS

Having thus described my invention, I claim:

- 1      1. A fishing pole holder comprising:
  - 2      a hollow cylindrically shaped holder having a first end and a second end;
  - 3      a cylindrically shaped base pole having a first end and a second end;
  - 4      said base pole having a predetermined diameter; and
  - 5      a means for attaching said base pole first end to a predetermined location
  - 6      between said holder first end and said holder second end at a substantially
  - 7      perpendicular angle.
  
- 1      2. The fishing pole holder of claim 1 wherein:
  - 2      said holder is made of PVC pipe.
  
- 1      3. The fishing pole holder of claim 1 wherein:
  - 2      said base pole is made of PVC pipe.
  
- 1      4. The fishing pole holder of claim 1 wherein:
  - 2      said base pole second end is pointed.

1       5.     The fishing pole holder of claim 1 wherein:  
2           said means for attaching is glue.

1       6.     The fishing pole holder of claim 1 wherein:  
2           said means for attaching is tape.

1       7.     The fishing pole holder of claim 1 wherein:  
2           said means for attaching is via an attachment piece fixably secured to said  
3           holder between said holder first end and said holder second end;  
4           said attachment piece is cylindrically shaped;  
5           said attachment piece is hollow; and  
6           said attachment piece has a diameter sized slightly larger than said base pole  
7           diameter.

1       8.     The fishing pole holder of claim 7 wherein:  
2           said attachment piece is made of PVC pipe.

1       9.     A method of using a fishing pole holder comprising a hollow  
2           cylindrically shaped holder having a first end and a second end; a

3 cylindrically shaped base pole having a first end and a second end; said  
4 base pole having a predetermined diameter; and a means for attaching  
5 said base pole first end to a predetermined location between said holder  
6 first end and said holder second end at a substantially perpendicular  
7 angle, said method comprising the steps of:

- 8 a. inserting said second end of said base pole into a ground surface  
9 at an angle so that the fishing pole holder is leaning away from the  
10 water; and  
11 b. inserting a fishing pole handle into said holder.

1 10. The method claimed in claim 9 wherein:

2 said means for attaching is via an attachment piece fixably secured on said  
3 holder between said holder first end and said holder second end; and  
4 said attachment piece has a diameter sized slightly larger than said base pole  
5 diameter.

1 11. The method claimed in claim 10 further comprising the step prior to step

2 b of:

3 placing said attachment piece diameter on said base pole first end.
